Commercial property owners were preparing their sites for certification last fiscal year, a long process that can easily take 6 months. As a result LED expects more certified sites during this fiscal year. As more land and property owners understand the benefit of having a certified site and start preparing their sites for certification, LED expects a robust number of sites to be certified in coming years.

The economy heavily impacting the ability of many small businesses to secure loans during FY 2009-2010, with only \$29 private dollars generated per state dollar invested, so the standard was reduced. Preparation work was completed on many loan applications, but because credit is tighter it is now more difficult to get loans approved (versus two years ago). With the oil spill and then the moratorium, many potential applicants have decided to delay their applications. The actual performance for FY 2010-2011 shows the delayed applications starting to move forward. It is expected to move toward former levels so the standard has been raised.
